

Quick Notes About Dokuwiki:

\\ = a new line character

---- = horizontal rule

[[external link or internal | displayed name]] = web link

{ {namespace:item: | displayed name} } = internal link to resources

uploading into the namespace, sponsorsandstudents makes it so that the general public cannot read those files

pages can be created simply by making a link to a page, clicking it, and editting the newly shown page with anything

pages can be deleted by editting the page and removing everything from the edittor

Images can link to nothing, a detailed page about itself, or an external link. Images CANNOT link to internal resources as of right now (July 2015). Might be able to change this later.

Dokuwiki is designed as a simple wiki and should be used as such, don't expect too much from it.

Uploading a Thesis

To edit a page, simply go to the page, and click the pencil on the far right

You get directed to a page like this, simply edit as necessary:

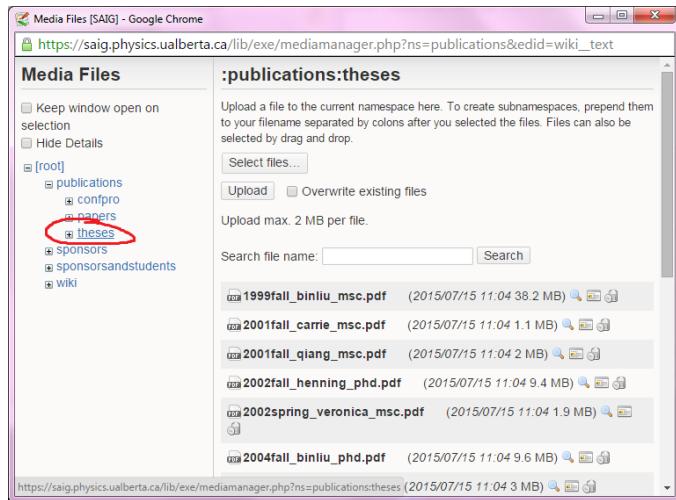

Edit the page and hit Save. See [syntax](#) for Wiki syntax. Please edit the page only if you can **improve** it. If you want to test some things, learn to make your first steps on the [playground](#).

The screenshot shows a MediaWiki editing interface. At the top is a toolbar with various icons for bold, italic, underline, etc. Below the toolbar is a text area containing XML-like code for a thesis. The text area includes sections like '<WRAP group>' and '<WRAP 60% column>'. At the bottom of the text area is a horizontal bar with buttons for 'Save', 'Preview', 'Cancel', 'Edit summary' (with a text input field), and 'Minor Changes'. To the right of these buttons are three small arrows pointing up, down, and left.

Circled button opens the “Media Manager” which allows users to upload content such as images, or any other documents

Select the correct namespace, (Theses in this instance)

Drag and drop the file, or browse for it and hit upload.

For organization, please name your thesis (YEAR/TERM_NAME_DEGREE)

Now that it's uploaded, return to the editting box and add the following lines above the other entries of the same format (red text is your input):

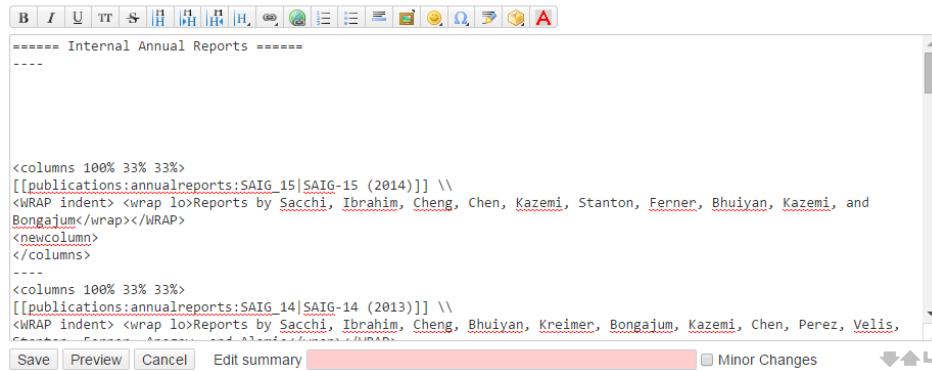

```
**<fc #008000>YEAR DEGREE(MSc/PhD), NAME</fc>**\\
<WRAP indent>{ { :publications:theses:FULL_FILE_NAME.pdf | THESIS
TITLE } }</WRAP>
```

Preview, make sure it's fine and then save. If there is a problem, check the brackets, <>, {}, as it's common to accidentally delete one of them. If the resulting link is red, it means that the link has a problem, meaning file names are not matching, check the names of the uploaded file and the filename string in the added entry.

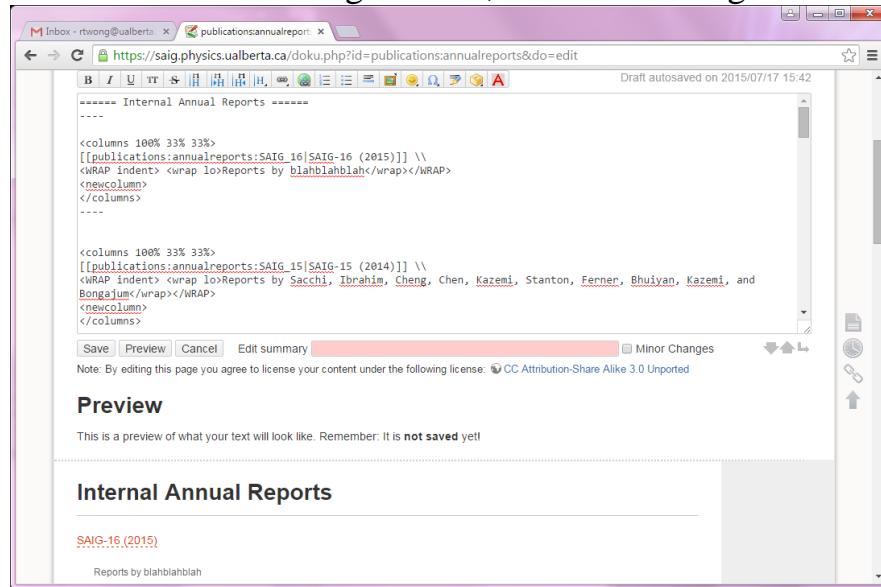

Creating Dokuwiki pages

If you need to create a new page, such as SAIG-16 (2015), under Annual Reports we create new pages by making links to them.

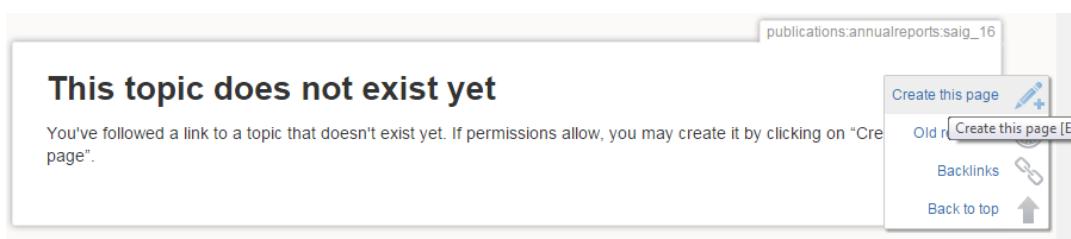

Edit the page and hit Save. See [syntax](#) for Wiki syntax. Please edit the page only if you can [improve](#) it. If you want to test some things, learn to make your first steps on the [playground](#).

Copy the block below it for formatting reasons, and make changes as needed.

As we can see a link has been created, save it, and go into it,

You get a “topic does not exist”, click create and type something into the editor, and the page now exists. Fill it in as desired.
